

Cloud Security Alliance APAC Codebook- October 2017

New Release of the Month

Updates to 'The Treacherous 12: Cloud Computing Top Threats in 2016'

The report includes new real-world anecdotes and examples of recent incidents that relate to each of the 12 cloud computing threat categories identified in the original paper.

The Treacherous 12 report provides organizations with an up-to-date, expert-informed understanding of cloud security concerns in order to make educated risk-management decisions regarding cloud adoption strategies. The report reflects the current consensus among security experts in the CSA community about the most significant security issues in the cloud.
