## CSA APAC SUMMIT

Co-hosted with IDA's CloudAsia

Organizations thrive and survive in the rapidly changing and increasingly competitive world of today by leveraging on every advantage possible. Technology, being the lifeblood of communications and transactions, forms an intrinsic and indispensable tool for nations, enterprises, and individuals.

Cloud technology has evolved from an exciting technology novelty into a white hot resource. Yet, adoption is far from optimal, and technological innovation within the field continues unabated. Never before has technology been so entwined with organizational optimization as with the advent of cloud. Charting viable directions from the myriad technology permutations for both users and their technology providers can be a daunting proposition.

This was why we had put together the CSA APAC Summit 2016. The Summit had discussed, updated, explained, clarified and helped map out your future in the Cloud.

Brought to you by the people who know Cloud best, the summit:

- Provided a knowledge pool of technology updates,
- Engaged users in the most relevant vertical sectors to share successes and lessons learned,
- Explored opportunities and challenges of Cloud usage in the diverse markets of our vibrant APAC region,
- Gathered the brightest minds in Cloud,
- Hotwired your cloud implementation by showcasing the best of breed experiences in case studies,
- Drove business innovation through new windows of possibilities offered by Cloud adoption

# AGENDA

## 09:00 am Registration

09:30 am	Welcome Address	<b>Aloysius Cheang,</b> Executive Vice President, Asia Pacific of Cloud Security Alliance
09:40 am	Opening Keynote	<b>Khoong Hock Yun,</b> Assistant Chief Executive Officer (Development) and Chief Data Officer, Infocomm Development Authority of Singapore (IDA)
10:00 am	Opening Keynote	<b>Jim Reavis,</b> Co-founder and CEO Cloud Security Alliance
10:30 am	Cybersecurity Threat and Operating in a Trusted Cloud Environment	<b>Wally Lee,</b> Cybersecurity Architect Cybersecurity Global Practice of Microsoft
11:00 am	Morning Tea	
11:15 am	Business Beyond Boundaries, Information In Motion	<b>Todd Partridge,</b> Director of Product Marketing Intralinks Holdings, Inc.
11:45 am	Why You Must Encrypt – And Why The Government Doesn't Want You To	<b>Daniel Lee,</b> APAC Security Solution Evangelist F5 Networks, Inc.
12:15 pm 12:45 pm	Panel Discussion: "Overcoming the Top Threats to Cloud Computing"	<p><b>Moderator</b></p> <p><b>Luciano "J.R." Santos,</b> Executive Vice President of Research Cloud Security Alliance</p> <p><b>Panelists</b></p> <p><b>Benildus Nadar,</b> Head of Security &amp; Global Delivery Deep Identity Pte. Ltd</p> <p><b>Eric T. Ashdown,</b> Cyber Security Managing Partner Ridge Partners LLC</p> <p><b>Kawin Boonyapredeedee,</b> Managing Director, Asia Pacific Qualys, Inc.</p> <p><b>Mandar Bale,</b> Strategic Business Manager, Asia, Pacific &amp; Japan FireEye</p>

## 12:45 am Lunch

02:00 pm	Application Security Fast Screening and Classification	<b>Keng Lee,</b> COO Gapertise Inc.
02:30 pm	The Future of Cloud & IoT Security	<b>Evan Dumas,</b> Head, Emerging Technologies APAC, Middle East, & Africa Check Point
03:00 pm	Enabling Cloud Adoptions with Security & Trust	<b>Dr. Kang Meng-Chow,</b> CISO, APJC Region Cisco Systems, Inc.
03:30 pm	Afternoon Tea	
04:00 pm	Managing Cloud Computing Paradoxes	<b>David Shearer,</b> CEO (ISC) <sup>2</sup>
04:30 pm	Panel Discussion: "Cloud and the Enterprise 2016"	<p><b>Moderator</b></p> <p><b>Jimmy Sng,</b> Partner, Technology Consulting, Singapore PricewaterhouseCoopers Consulting</p> <p><b>Panelists</b></p> <p><b>Hoo Chuan-Wei,</b> Technical Advisor Asia Pacific of (ISC)<sup>2</sup></p> <p><b>Richard Keirstead,</b> Audit Director for Technology Australia and New Zealand Banking Group</p> <p><b>Sai Honig,</b> Information Security Manager Waikato District Health Board</p> <p><b>Ilia Tivin,</b> APJ Datacenter and cloud security pursuit Hewlett-Packard Enterprise</p>
05:00 pm	Closing Keynote	<b>Martin Leo,</b> Executive Director Morgan Stanley Investment Management
06:00 pm 09:00pm	Cocktail Reception

**CSAAPAC SUMMIT 2016**

Organizations thrive and survive in the rapidly changing and highly competitive world of today by leveraging on every advantage possible.

Technology, being the lifeblood of communications and transactions, forms an intrinsic and indispensable tool for nations, enterprises, and individuals.

Cloud technology has emerged as an exciting technology reality into a reality that requires the adoption of new operational, and technological innovations within the fold continues unabated. Before before has technology been a mere tool for organizational operations as with the advent of cloud, cloud computing has become the key to digital technology transformation for both users and their technology providers can be a reality.

Which is why we are putting together the CSA APAC Summit 2016. To discuss, update, explore, clarify, and help map your future in the Cloud. Bring it to you by the people who know cloud best.

**REGISTER**

**Speakers:**

- Jim Reavis, Chairman and Managing Director, Cloud Security Alliance
- Martin Lee, President, Singapore Cyber Security Centre
- Kevin Boonayappan, Director, Singapore Cyber Security Centre
- Anthony Lim, President, Singapore Cyber Security Centre
- Hongfei Guo, President, Singapore Cyber Security Centre

**Guest of Honour**

**Kheong Hock Yan**  
President, Singapore Cyber Security Centre

**The speakers ready to deliver their innovative content.**

Speakers are invited, and over 200 of your fellow industry professionals have been invited to attend - the only thing missing is you.

Don't just take our word for it - here is what our attendees are saying:

**Join us to get deeper insights into the future of cloud computing.**

Don't miss out on this chance to participate in a world class conference. Register today to secure your seat at the CSA APAC Summit!

## Platinum Sponsor

### Amazon Web Services

In 2006, Amazon Web Services (AWS) began offering IT infrastructure services to businesses in the form of web services -- now commonly known as cloud computing. One of the key benefits of cloud computing is the opportunity to replace up-front capital infrastructure expenses with low variable costs that scale with your business. With the Cloud, businesses no longer need to plan for and procure servers and other IT infrastructure weeks or months in advance. Instead, they can instantly spin up hundreds or thousands of servers in minutes and deliver results faster. For more information, please visit [aws.amazon.com](http://aws.amazon.com).

### F5 Networks

F5 (NASDAQ: FVFI) provides solutions for an application world. F5 helps organizations seamlessly scale cloud, data center, and software defined networking (SDN) deployments to successfully deliver applications to anyone, anywhere, at any time. F5 solutions broaden the reach of IT through an open, extensible framework and a rich partner ecosystem of leading technology and data center orchestration vendors. This approach lets customers pursue the infrastructure model that best fits their needs over time. The world's largest businesses, service providers, government entities, and consumer brands rely on F5 to stay ahead of cloud, security, and mobility trends. For more information, go to [f5.com](http://f5.com).

You can also follow @F5Networks on Twitter or visit us on Facebook for more information about F5, its partners, and technologies. For a complete listing of F5 community sites, please visit [www.f5.com/news-press-events/web-media/community.html](http://www.f5.com/news-press-events/web-media/community.html).

### IntraLinks

IntraLinks Holdings, Inc. founded in 1996, is a global technology provider of inter-enterprise content management and collaboration solutions. Its products serve the enterprise collaboration and strategic transaction markets, enabling the exchange, control, and management of information between organizations. For more information, please visit <http://www.intralinks.com>.

### Microsoft

Microsoft is the leading platform and productivity company for the mobile-first, cloud-first world, and its mission is to empower every person and every organization on the planet to achieve more. For more information, please visit <http://microsoft.com>.

## Gold Sponsor

### Check Point

Check Point Software Technologies Ltd., the largest pure-play security vendor globally, provides industry-leading solutions, and protects customers from cyberattacks with an unmatched catch rate of malware and other types of attacks. Check Point offers a complete security architecture defending enterprises' networks to mobile devices, in addition to the most comprehensive and intuitive security management. Check Point first pioneered the industry with Firewall-1 and its patented stateful inspection technology. For more information, please visit [www.checkpoint.com/](http://www.checkpoint.com/).

## Silver Sponsor

### Gapertise

Gapertise's Technical team has many years of technical experience. In recent years, committed to develop the mobile security management and Application control systems. After two years, we create an AUP APP security testing platform. In 2015, under the CSA Asia-Pacific R & D center's framework, Taiwan's Cloud Security Alliance plays the role of the Taiwan internationalization and globalization's promoter. Formal planning for the establishment of APP detection standards' working group (APT WGs, APP Testing Working Group) and invited Gapertise Inc. Participation "room-setting" and "promotion of certification" work. Currently, APP detection system do not need the source code to quickly detect a large number (production-line), only a handful of the world's. Among, Gapertise's AUP detection platform has the most complete mechanism and can be detected with a 500,000 annual capacity APP. It can be said as the industry pioneer.

### Qualys

Qualys, Inc. is a pioneer and leading provider of cloud-based security and compliance solutions with over 7,700 customers in more than 100 countries, including a majority of each of the Forbes Global 100 and Fortune 100. The Qualys Cloud Platform and integrated suite of solutions help organizations simplify security operations and lower the cost of compliance by delivering critical security intelligence on demand and automating the full spectrum of auditing, compliance and protection for IT systems and web applications. Founded in 1999, Qualys has established strategic partnerships with leading managed service providers and consulting organizations including Accenture, BT, Cognizant Technology Solutions, Deloitte, Fujitsu, HCL, Comptel, Infosys, NTT, Optix, Tata Communications, Verizon and Wipro. The company is also a founding member of the Cloud Security Alliance (CSA). For more information, please visit [www.qualys.com](http://www.qualys.com).

## CSA APAC Summit 2016

Co-hosted with IDA's CloudAsia  
Tuesday, May 3, 2016, 09:30 am - 05:30 pm  
Suntec Convention & Exhibition Centre Singapore, Singapore

Time	Topic
09:00 am - 09:30 am	Registration
09:30 am - 09:40 am	Welcome Address
09:40 am - 10:00 am	Opening Remarks <b>Kheng Hock Yee, Assistant Chief Executive Officer (Development) and Chief Data Officer of Infocom Development Authority of Singapore (IDA)</b>
10:00 am - 10:30 am	Opening Remarks <b>Jim Heave, Co-founder and CEO of Cloud Security Alliance</b>
10:30 am - 11:00 am	Cybersecurity Threat and Operating in a Trusted Cloud Environment <b>Willy Lee, Cybersecurity Architect, Cybersecurity Global Practice of Microsoft</b>
11:00 am - 11:15 am	The world has gotten more complex. Cybersecurity threats make security harder now for everyone, but public cloud makes it easier as it shifts security load to provider instead of the user. However, moving everything to cloud doesn't mean organizations have to just abandon, isolate, maintain the cloud and shift their security focus to data, identity, and application. During this session we will discuss how organizations can introduce simple security best practices in their cloud journey to make it smoother and secure.
11:15 am - 11:45 am	Moving Up <b>Business Beyond Boundaries, Information in Motion</b> <b>Todd Partridge, Director of Product Marketing of Intelnet Holdings, Inc.</b>
11:45 am - 12:15 pm	Access of industries exists the challenge of efficiently managing company data in accordance with defined controls. While there are many tried and true strategies and technologies focused on managing information at all, today's enterprise is also tasked with protecting information in motion. As technology becomes more accessible to business users, the enterprise needs to ensure that information security and compliance standards are met. Faced with information having the enterprise through a variety of both outside that control, companies quickly need to address the causes of uncontrolled data leakage and identity solutions for protecting their content.
12:15 pm - 12:45 pm	Why You Must Encrypt - And Why The Government Doesn't Want You To <b>Daniel Lee, APAC Security Solutions Evangelist of F5 Networks, Inc.</b>
	Open security agencies are being challenged by greater movement of often sensitive corporate data to and from mobile devices and cloud services. The industry's answer has been to progressively mandate the use of encryption everywhere - but with governments pursuing increasingly draconian powers, is encryption really all the protection it's cracked up to be? This session will explore available encryption techniques; strategies for deciding what to encrypt and how; encryption's role in good data governance; and the potential implications of government decryption powers.
	Panel Discussion: "Overcoming the Top Threats to Cloud Computing"

Moderator	Panelists
<b>Ludovic "J.J.R." Santos, Executive Vice President of Research of Cloud Security Alliance</b>	
<b>Panelists:</b> <b>Benjamin Noller, Head of Global Security of Deep Identity Pty. Ltd.</b> <b>Eric T. Ashdown, Cyber Security Managing Partner of Ridge Partners LLC</b> <b>Karen Invernizzi, Managing Director, Asia Pacific of Qualys, Inc.</b> <b>Mander Bala, Strategic Business Manager, Asia Pacific &amp; Japan of FireEye</b>	
	Cloud computing represents the next generation of IT and can be the most secure option, if understood and managed properly. In this panel, leading industry experts discuss the top security threats to cloud computing usage as defined by Cloud Security Alliance. This panel will outline the threat vectors that are unique to or magnified by cloud computing, and discuss preventive security measures that can be deployed to mitigate security risks. From data protection to policy compliance to threat detection and remediation, the panel will provide state of the art advice that attendees can use today to protect their cloud investments.
12:45 pm - 02:00 pm	Lunch

02:00 pm - 02:30 pm	Application Security Post Breaching and Classification <b>Kerry Lee, CIO of Gapertise Inc.</b>
	Mobile applications have not only become indispensable to modern life, but have also become part of all organizations. With the emergence of cloud computing technology, organizational environment is needed to adapt to this fundamental change. Cloud computing enables real-time use of applications, offering the enterprise immense flexibility. Accompanied by this convenience, with the inclusion of applications security problems resulting from the lack of transparency present challenges to risk management. Cloud Security Alliance Mobile Application Security Testing Initiative strives to create a more secured cloud ecosystem to protect mobile applications. Engineering methods are established by system protection and applied to practice, design testing and review of applications. The working group on other things like from Gapertise will be sharing our recently released Mobile Application Security Testing whitepaper in this session.
02:30 pm - 03:00 pm	The Future of Cloud & IoT Security <b>Evon Dumas, Head, Emerging Technologies APAC, Mobile East, &amp; Africa of Check Point</b>
	Data center virtualization has come a long way transforming from a hardware-focused approach to application-focused approach. This has created unique challenges. To complicate matters, cloud environments are becoming more complex with organizations relying from multiple cloud vendors. The Internet of Things (IoT) trend has also further new challenges. In this session, we will share our security strategy in the face of this vulnerability.
03:00 pm - 03:30 pm	Enabling Cloud Adoption with Security & Trust <b>Dr. Meng-Chow Keng, CEO, APAC Region of Cisco Systems, Inc.</b>
	Cloud computing has reached a tipping point as many organizations have either adopted, or are planning to adopt, some form of cloud computing technology - whether IT assets and manages it or not. "Open to capability" is one of the primary reasons that individuals, and businesses are moving using cloud. Despite this, many IT executives remain hesitant to embrace a "cloud first" approach. While there may be security and privacy challenges, reluctance to migrate to the cloud can potentially increase an organization's risk rather than mitigating it. This session discusses Cisco's approach towards enabling security and trust, addressing the underlying challenges, and enabling rapid cloud adoption in its enterprise.
03:30 pm - 04:00 pm	Attention: Us <b>Managing Cloud Computing Paradoxes</b> <b>David Shearer, CEO of ePCF</b>
	As pressure mounts to leverage the operational expense (OpEx) versus capital expense (CapEx) model that cloud solutions and services provide, many organizations are caught up in a series of personnel and real paradoxes. For example, some organizations feel it's more difficult to secure information in the cloud, while others believe moving your data to the cloud can actually improve an organization's information security posture. Some organizations are drawn to the pure play of cloud-based solutions versus on-premise solutions based on price-point, speed of deployment, implementability, adaptability, and elasticity of the cloud. Conversely, other organizations are seeing rapid growth of cloud solutions across their enterprise with other enterprise security considerations. This session will provide some suggestions for dealing with paradoxes like these and enabling cloud solutions and services in a more predictable way.
04:00 pm - 05:00 pm	Panel Discussion: "Cloud and the Enterprise 2016"
	<b>Moderator:</b> <b>Jimmy Eng, Partner, Technology Consulting, Singapore of PricewaterhouseCoopers Consulting</b>
	<b>Panelists:</b> <b>Hao Chao Wei, Technical Advisor of Asia Pacific of BGC</b> <b>Robert Kienreich, Audit Director for Technology of Australia and New Zealand Banking Group</b> <b>Lee Hong, Information Security Manager of Republic District Health Board</b> <b>Bernard Aude, Head of Mobile, IoT, Digital, Asia Pacific &amp; Japan of Hewlett Packard Enterprise</b>
	A large enterprise accelerated their cloud adoption in 2015, and many are expecting to be "all in". Our panelists have been at the forefront in addressing enterprise security and compliance needs in the cloud and will be providing their insights on security innovations in the cloud, attendees will learn about the key security issues learned from the perspective of cloud providers. Which best practices are well suited for cloud and which are security providers' threat vectors to prevent against to use 2015 to improve cloud security? Hear from the best and the brightest among cloud providers to learn from their experiences partnering with customers to deliver secure enterprise cloud computing. Understand where Cloud is going (beyond by hearing our findings on Cloud Adoption in APAC).
05:00 pm - 05:30 pm	Closing Remarks <b>Maria Lee, Executive Director of Morgan Stanley Investment Management</b>
05:30 pm - 06:00 pm	Cocktail Reception

Guest of Honor	Sponsors
<b>Mr. Lim Joo Keng, Chairman of the Board, Singapore Telecommunications Limited</b>	<b>Qualys</b>

# CSA APAC SUMMIT 2016

## CSA APAC Summit 2016

Co-hosted with IDA's CloudAsia

Tuesday, May 3, 2016, 09:30 am - 05:30 pm  
Suntec Convention & Exhibition Centre Singapore, Singapore

This registration is closed now. But you can still register on-site.

Organizations thrive and survive in the rapidly changing and increasingly competitive world of today by leveraging on every advantage possible. Technology, being the lifeblood of communications and transactions, forms an intrinsic and indispensable tool for nations, enterprises, and individuals.

Cloud technology has evolved from an exciting technology novelty into a white hot resource. Yet, adoption is far from optimal, and technological innovation within the field continues unabated. Never before has technology been so entwined with organizational optimization as with the advent of cloud. Charting viable directions from the myriad technology permutations for both users and their technology providers can be a daunting proposition.

Which is why we are putting together the CSA APAC Summit 2016. To discuss, update, explain, clarify, and help out map our future in the Cloud. Brought to you by the people who know Cloud best, the summit will:

- Provide a knowledge pool of technology updates.
- Engage users in the most relevant vertical sectors to share successes and lessons learnt.
- Explore the opportunities and challenges of Cloud usage in the diverse markets of the vibrant APAC region.
- Gather the brightest minds inCloud.
- Hotwire your cloud implementation by showcasing the best of breed experiences in case studies.
- Driving business innovation through new windows of possibilities offered by Cloud adoption.
