

CSA ASEAN Virtual Summit 2020

7-9 September 2020 | Virtual Conference

Cloud Security in the post COVID-19 Lockdown Era

As COVID-19 reshapes social interactions and transforms work environments to more digital settings, cloud solutions have also emerged as the drivers of business during the pandemic for enterprises and startups alike. The threat landscape on cyberspace and cloud is also evolving with new vulnerabilities emerging. During this time, a key enabler of digital transformation acceleration is cloud security, not just as an operating model but also as a technological shift. Is this the catalyst that technology companies are longing for?

Leading experts from ASEAN countries with domain proficiency and expertise discussed key issues and trends facing cloud security and cybersecurity today at this 3-day virtual Summit organized by CSA APAC & CSA Thailand Chapter on 7-9 Sep 2020.

PROGRAM

The CSA ASEAN Virtual Summit commenced with Welcome Remarks from Jim Reavis (Co-Founder & CEO, CSA) and an opening keynote from Jakkanit KANANURAK (Vice President for Quality of Life and Security Development and Promotion Department, Digital Economy Promotion Agency (DEPA)/ Ministry of Digital Economy and Society) on “Thailand After Post COVID-19: The Essential Upskill/ Reskill on Cloud Security”.

The keynote was followed by a stellar line-up of 8 presentations by invited speakers and panel discussions (on Days 1-3). Key topics included:

- “Acceleration of Digital Transformation in a Post COVID World”
- “FedRAMP - How Did We Get There and Where are We Now?”
- “Hybrid Clouds - Challenges”
- “Removing Barriers to Cyber Security”
- “Reflective Security & DevSecOps”
- “CIO's Perspective on HPC Cloud”

and three panel discussions like

- “Impact of COVID-19 on Cloud Adoption in ASEAN”
- “Cloud Adoption in ASEAN & Challenges” and
- “Aftermath of Pandemic Lockdown Cloud Adoption – Curse or Boon”.

Other industry thought leaders and eminent individuals in cloud computing and cloud security spoke on topics such as:

- In the opening keynote speech by Dr. Jakkanit KANANURAK (VP, Digital Economy Promotion Agency / Ministry of Digital Economy and Society) shared the Thailand situation post COVID-19. He emphasized the need for essential training offered by CSA on cloud security to upskill/reskill the skill force of Thailand professionals.
- In David FAIRMAN (APAC CSO, Netskope)’s keynote presentation on “Acceleration of Digital Transformation in a post COVID world”, he shared the evolution of digital transformation in the recent pandemic, on how the workforce is changing and how organizations need to think about that journey to address cyber risks.
- “Hybrid Clouds - Challenges” was presented by Narudom ROONGSIRIWONG (Head, IT Security, Kiatnakin Public Bank, Thailand); he provided an overview of hybrid cloud, its risks, threats, vulnerabilities, and hybrid cloud use cases.
- Ronald TSE (CEO, Ribose & Co-Chair, CSA DevSecOps WG) shared that CSA research is available to help organizations transition to the cloud, enhance security in the cloud, and innovate from the cloud in this presentation “Reflexive Security & DevSecOps”. He explained the principles and benefits of the novel management framework around DevSecOps, presented with examples of best practices that fit into this framework.

- Dr. Putchong UTHAYOPAS (VP for Digital Technology, Kasetsart University, Thailand) in his presentation on “CIO's Perspective on HPC Cloud” mentioned that the HPC and AI, or shortly HPCAI, become increasingly important for both academics and industry. Many emerging types of research in biomedical, genomics, material science and nanotechnology, environmental, pharmaceutical rely heavily on the power of HPCAI for the understanding of the very large and complex problem. Moreover, many industries such as pharmaceutical, financial and banking, insurance, manufacturing, security rely more and more on advances in HPCAI. He shared the security issues and concerns of the CIO who need to handle HPC cloud infrastructure for their organization. And also highlighted general practices and guidelines that will help the CIOs.
