

CSA Malaysia Summit 2018 Post Event Report

20 August 2018 | Empire Hotel, Subang

Today, cloud represents the preferred IT system by which organizations will transform themselves over the coming years. As cloud represents the future of an agile enterprise, new technology trends, such as Internet of Things, quantum computing, and container technologies extend the benefits of cloud – but also creates new attack vectors for ambitious and resourceful adversaries. The summit will discuss global governance, the latest trends in technology, the threat landscape, security innovations, best practices and global governance in order to help organizations address the new frontiers in cloud security.

KEY HIGHLIGHTS

- Release of Malaysia Financial Sector Cloud Adoption Report

Download the report [here](#).

- Roundtable Discussion on '**Banking 4.0 - Digital Transformation, Opportunities & Challenges**' to explore deeper issues and challenges in FSI Malaysia which were not covered in the report.
- Announcement of development Cloud Security Guidance document and its planned evolution to a Malaysian PDPA standard which is jointly developed by MDEC and CSA.
