

CSA Vietnam Summit 2019 Post Event Report

11 April 2019 | Saigon Prince Hotel, Ho Chi Minh City, Vietnam

Today, cloud represents the preferred IT system by which organizations will transform themselves over the coming years. Cloud computing represents the future of an agile enterprise, new technology trends, such as Internet of Things, quantum computing, and container technologies.

The theme of this summit was "**Moving into the Cloud**" and targeted the user community from the private, public and people sectors towards cloud adoption. The summit discussed best practices and global governance as well as knowledge & experience sharing by Vietnamese enterprises that have already embarked on their cloud journey.

PROGRAM

Son Ho Thanh, Co-Founder & Chairman, CSA Vietnam Community and Jim REAVIS, Chief Executive Officer & Co-Founder, Cloud Security Alliance, commenced the inaugural CSA Vietnam Summit by celebrating the 10th year anniversary of CSA and venturing into a new market. This was followed by a line-up of 7 presentations and a panel discussion, delivered by esteemed individuals in the tech and IT industry. Topics covered included “Opportunity of Cloud Computing Services in Vietnam”, “Advanced Security for Your Cloud”, “Smart Cities: Securing Connected Vehicles”, a dialogue on “The Value of Cloud Certification” and panel discussion on “Regulations are Hindering Cloud Adoption - True or False?”.

Presentations were made by the industry’s notable thought leaders and valued individuals in cloud, who spoke on topics such as:

- In a visionary presentation on “Opportunity of Cloud Computing Services in Vietnam”, Vu Hoang Lien, Chairman of Vietnam Internet Association gave an overview of how far Vietnam has progressed, her current cloud readiness and strategies to move forward in the competitive international market.
- Dr. Hing-Yan Lee, EVP APAC of CSA, shared how CSA can help the cloud community to (1) Build a trusted environment by leveraging its suite of cloud risk management tools; (2) Enhance its technical competency for IT professionals to exploit the cloud computing paradigm through the Certified Cloud Security Knowledge (CCSK); and (3) Enrich its research capabilities by participating in its research working groups that address important issues pertaining using the cloud to secure other forms of computing such as AI, IoT, blockchain, big data, etc.
- In the ever-evolving threat landscape, Grant Asplund, Cloud Evangelist of Check Point delivered a thought-provoking session to gain practical knowledge of not only the risks but also how to close your security gaps in the cloud in his presentation on “Advanced Security for Your Cloud”.
- In his presentation on “Smart Cities: Securing Connected Vehicles”, Haojie Zhuang, Research Director APAC of CSA shared on the complex ecosystems that connected vehicles operate in and gave an insightful overview of the evolution of vehicle connectivity, notable hacks, current measures and recommendations for securing the Connected Vehicles environment.
- Nguyen Trung Luan, Business Director of Mi2 JSC educated the audience on the importance for Cloud Service Providers (CSPs) to remain competitive and relevant in today’s market with certification in a dialogue session titled “The Value of Cloud Certification”. Though a common method, it has proven its efficacy to provide an additional but pertinent layer of assurance to cloud users.
